

Castle Hill Pre-School Kindergarten Inc.

17th August 2010

TO WHOM IT MAY CONCERN

During the past 2 years, Synthetic Grass & Rubber Surfaces have installed 2 sofffall areas in the outdoor environment.

TPV Rubber Wetpour was used in the area completed in April, 2010. This is a very large area and the Pre-School was extremely fortunate to be upgraded to TPV Rubber Wetpour just before installation. The final product is smooth with a slight gradient to allow for water run-off. It looks and feels great and adheres to the Australian Standards necessary for a Pre-School.

Synthetic Grass and Rubber Surfaces Australia were extremely helpful and reliable. Their work ethics matched the quality of the material being installed.

Yours sincerely

Belinda L. Peddar
