

# Are you replacing rubber surfaces every two to four years?

---

## Uncover the science to longer-lasting sports and leisure surfaces with Rosehill TPV®

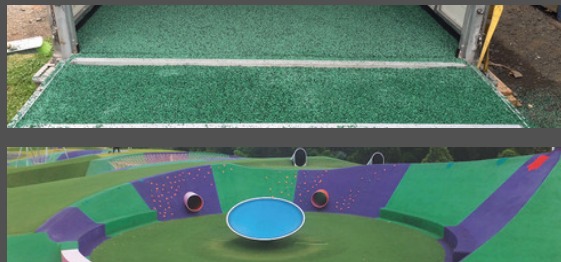

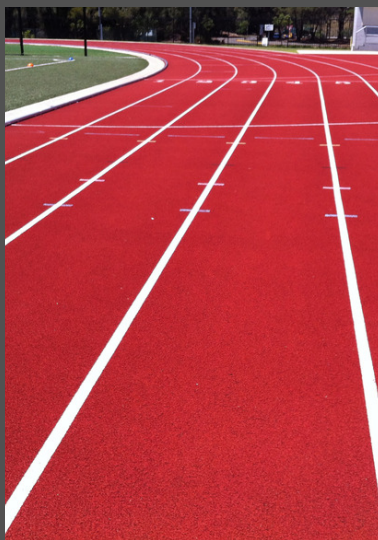

# Rosehill TPV®

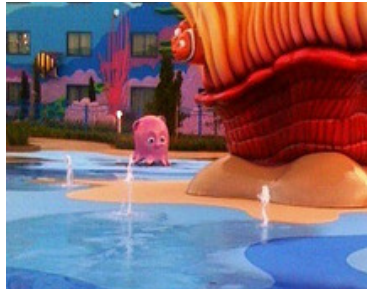

---

The ultimate in coloured rubber granules and polyurethane binders for both indoor and outdoor sports and play surfaces.

As specified by governments, architects and highly specialised installers.

**Specified by architects, schools and councils across Australia and New Zealand, Rosehill TPV® delivers the highest level of surface performance for competition, training, play and leisure.**

Produced using high grade polymer and thermoplastic materials, and is cross-linked and vulcanized. It is a mix of high quality virgin polymer, anti-oxidants and uv stabilizers that make it the premium product in the rubber wetpour industry.

Developed 11-12 years ago as a robust and versatile alternative to other comparable products available. Tested with actual installations in place, Rosehill TPV® has excellent long-term ageing properties, even in our extreme Australian climate.

Rosehill TPV® has better colour consistency and superior UV stability, outlasting any other rubber across the spectrum. It is manufactured using a virgin base polymer that has been vulcanized – a different base polymer to EPDM.

Rosehill Polymers are the only company that manufactures the product, and from their facility in the UK – they don't sub-contract out the process.

Being manufacturers they follow the same exacting production methods and material testing. They also use a continuous line batching machine which gives great colour consistency between batches.

#### Some Architects who specify Rosehill TPV®

- JMD Design
- Sturt Noble & Associates
- Architects of Arcadia
- Hassell
- Conrad Gargett
- Ellis Group
- Mode Design
- TCL Architects

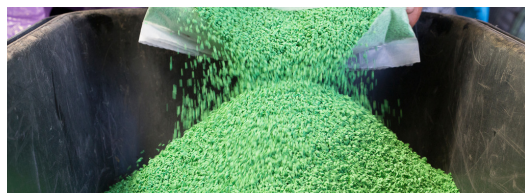

#### Rosehill TPV® has been used globally for years across such projects as:

- London Olympic Stadium Circle Bridge
- Disney
- Sea World
- Universal Studios
- Wet'n'Wild, Sydney
- Margaret Mahy Park, Christchurch
- Tamworth Regional Playground, NSW

#### COMPLIANCE TO AUSTRALIAN STANDARDS

Rosehill TPV® complies to Australian Standards AS/NZS4422:1996, as well as global standards BS EN 1177 and BS 7188.

To ensure that you have the genuine Rosehill TPV® product, we will issue a Certificate of Authenticity with every order. If you have not received this, you may not have true Rosehill TPV®. In order to know you have the true product, request a Certificate of Authenticity.

The best installers, globally, use Rosehill TPV®, they know it lasts the test of time. Don't take our word, use it in your next project and find out for yourself.
